PROFESSIONAL SUMMARY

Cybersecurity professional with hands-on experience investigating authentication anomalies, escalating incidents, and supporting enterprise security operations within a state government environment. I am skilled in SIEM monitoring, access control enforcement, and change impact analysis. CompTIA Security+ certified with a foundation in threat detection and defensive operations.

TECHNICAL SKILLS

IAM & Security: Access Control, MFA, Identity Verification, Risk Assessment
SIEM & Monitoring: Microsoft Sentinel, SIEM Architecture, Log Analysis, KQL, Splunk
Cloud & Systems: AWS, Azure Resource Groups, Active Directory
Tools: PowerShell, Linux CLI, Helix Ticketing, Nmap, Wireshark, pfSense, Metasploit
Frameworks: MITRE ATT&CK, ISO/IEC 27001 and 27002, NIST Cybersecurity Framework (CSF) 2.0

WORK EXPERIENCE

IT Client Specialist

State of Michigan - Department of Technology, Management, and Budget (DTMB) | 10/2023 - Present

- Identified and eliminated a data exposure vulnerability in the LCAB process by replacing email-based distribution of sensitive Excel files with a centralized Active Directory security group model, significantly reducing redundant data copies and minimizing endpoint attack surface.
- Investigated anomalous authentication activity and escalated confirmed incidents through Helix IR workflows.
- Reviewed elevated access requests to prevent privilege escalation and enforce IAM controls.
- Assessed security impact of infrastructure and application changes during RFC reviews.
- Deployed branch office security cameras and hardened endpoint configurations to improve enterprise security posture.
- Administered VPN tokens and Azure security groups aligned with Least Privilege controls.

Personal Computer Technician

Lansing Community College | 08/2022 - 10/2023

- Assisted in post-incident remediation and system restoration following a campus cybersecurity event.
- Escalated confirmed security incidents to infrastructure and network teams for advanced investigation.
- Maintained top 10% ticket resolution performance while supporting over 20,000 users.

EDUCATION

Bachelor of Science - Cyber Defense (Minor: Information Assurance) - 09/2021 - 05/2026
Davenport University | 3.6 GPA

Associate of Applied Science - Cybersecurity – 08/2022 - 05/2025
Lansing Community College | 3.92 GPA

PROJECTS

SOC Architecture & Risk Analysis - Capstone | 2025-2026

- Designed AWS-based SOC proof of concept with centralized SIEM and alert triage workflow.
- Engineered detection use cases for brute force and privilege escalation mapped to MITRE ATT&CK.

Home Labs & Continuous Learning

Azure Sentinel RDP Alerting Lab

- Deployed Azure VM and integrated Microsoft Sentinel for log ingestion and threat monitoring.
- Authored KQL queries to detect anomalous RDP activity and credential abuse patterns.

TryHackMe (Level 8 | Top 7% Global | tryhackme.com/p/troutea1)

- Completed 77+ rooms focused on SOC operations, threat detection, and defensive security techniques.

CERTIFICATIONS

CompTIA Security+ (SYO-701), 2026 | $(ISC)^2$ Certified in Cybersecurity (CC), 2026
